

# Ruville 5852 wheel bearings

Welcome to the 45 mm d Ruville 5852 wheel bearings 136.52 mm bolt circle diameter: online seller.

|                               |                              |
|-------------------------------|------------------------------|
| d                             | 45 mm                        |
| seal type:                    | Labyrinth                    |
| bolt circle diameter:         | 136.52 mm                    |
| overall depth:                | 79.38 mm                     |
| B                             | 161.9 mm                     |
| radial dynamic load capacity: | 21200 lb                     |
| flange mounting type:         | Round                        |
| radial static load capacity:  | 33200 lb                     |
| bearing type:                 | Spherical Roller             |
| maximum rpm:                  | 2800 RPM                     |
| housing construction:         | Solid Flange Mount           |
| finish/coating:               | Powder Coated                |
| bore type:                    | Round                        |
| lubrication type:             | Lubrication Fitting          |
| housing material:             | Cast Iron                    |
| standards met:                | ANSI/ABMA STD 9-1990         |
| locking device:               | Set Screw                    |
| series:                       | 400                          |
| expansion type:               | Expansion Bearing (Floating) |
