

where to buy a ntn 6906 lu bearing

[NTN 6906 LUBEARING](#) is a kind of deep groove ball bearing. It has a high load capacity and high accuracy. NTN 6906 LUBEARING is suitable for mechanical part, such as machine tool spindle, medical equipment spindle, precision instrument spindle, etc. The inner diameter is 30 mm, outer diameter is 50 mm and width is 20 mm. NTN 6906 LUBEARING adopts a high-quality steel with its plating layer in PVD treatment process. The bearing has a good corrosion resistance and can be used in various environments (for example, salty or alkaline) for a long time.

The main application areas of NTN 6906 LU Bearings: aerospace engineering, metal cutting machine tools, steel processing equipment, paper making machinery, cement machinery and other fields. The main types of NTN 6906 LU bearings: deep groove ball bearings, angular contact ball bearings, cylindrical roller bearings and so on.

NTN Bearing Corp. Japan

NTN Bearing Corp. is one of the world's leading manufacturers of advanced bearings. The company was founded in 1899, and its products are now sold in more than 150 countries around the world. NTN's comprehensive product range includes needle roller bearings, cylindrical roller bearings, angular contact ball bearings, thrust ball bearings, spherical roller bearings and tapered roller bearings, which are used in a wide variety of applications including machine tools, motors and generators – both industrial and automotive – as well as office equipment such as printers and copiers.

NTN 6906 LU bearing is one of the famous brand products, their quality is very good in the world, a lot of machine tool manufacturers are using NTN 6906 LU bearing for their

equipment.

American Roller Bearing Co. USA

American Roller Bearing Co. USA is one of the leading manufacturers and suppliers of Ntn 6906 Lu Bearing.

American Roller Bearing Company is a leading worldwide supplier of cylindrical roller bearings, tapered roller bearings, spherical roller bearings and needle roller bearings, including super-precision bearings for engineering applications. The company offers a wide range of standard products, as well as custom-designed bearings to meet specific customer requirements.

American Roller Bearing Co., founded in 1917, has been owned and operated by the same family since its inception. The company is headquartered in Chicago, Illinois with sales offices located throughout North America and Europe.

THB Bearings

NTN 6906-LU bearing is a pillow block bearing has a single row of balls, a double row of rollers, and a cage with solid ends. The inner ring has a lip on which the balls ride. The outer ring has three slots that hold the cage in place. This bearing has an open design without seals or shields.

NTN 6906-LU bearings are widely used in various industries, such as automobile engines and transmissions, machine tools, construction equipment, agricultural machinery and so on.

THB Bearings is one of the leading ntn 6906 lu bearing manufacturers and suppliers in China, as a professional company with its own factory, it can produce good quality ntn 6906 lu bearing products.

KBC Bearings North America

KBC Bearings North America, Inc. is one of the largest independent providers of bearings, seal and power transmission solutions to the industrial and transmission markets. KBC has operations in North America, Europe and Asia-Pacific regions, with a product portfolio that includes seals, bearings and other related products for the power generation, oil & gas, mining and process industries.

KBC Bearings North America is a leading distributor of NTN bearings. NTN 6906 LU bearing is a type of deep groove ball bearing, it has the same structure and usage as other common bearing types. The only difference is that its rolling elements are made from chrome steel with the addition of molybdenum to the outer ring raceway. This makes it possible for the outer ring raceway to withstand high speeds and loads without deformation and fretting.

Schaeffler Technologies AG Co. KG (INA) Germany.

Schaeffler Technologies AG Co. KG (INA) Germany is one of the largest manufacturers in the world, as well as a leading supplier of bearings, plain and rolling elements, mechatronics and systems in the automotive industry and other sectors. The product range includes ball bearings, roller bearings, spherical roller bearings, planetary roller bearings and cylindrical roller bearings for all types of applications: for industrial applications, for mechanical engineering applications and for construction equipment, agricultural machinery and vehicles.

The Ntn 6906 Lu Bearing is a common size bearing and is available in pad, cone and cylindrical form. The most common bearings are deep groove ball bearings and shallow groove ball

bearings. They can be single row or double row. Some have metal shields to protect the bearing from dust or dirt, which may be necessary in some applications.

Ritbearing Corporation of America.

Ritbearing Corporation of America, a leading manufacturer and distributor of ball bearings, linear motion components and industrial maintenance products, is pleased to announce that they have added the NTN 6906 LU bearing to their product offering.

The NTN 6906 LU bearing is a single row deep groove ball bearing with a 60mm outer diameter, 20mm inner diameter and 22mm width. The bearing has an open design with two steel shields and four locking shields for additional protection against the environment. The seal consists of a PTFE seal ring which can be lubricated for extended life. The bearing has a static load rating of 63600 N at a speed of 2500 RPM.

The NTN 6906 LU bearing can be found in many industries including food processing equipment, office automation equipment, construction machines, wind turbines and more!

The above are some popular and reliable companies that produce ntn 6906 lu bearings.

NTN is one of the leading manufacturers of bearings in Japan. It has rich experience in the manufacture of bearing products for more than 100 years, and its products sell well in more than 130 countries and regions worldwide. The brand has always been recognized as one of the most authoritative brands in the world.

NTN 6906 LU bearing is specially designed for high-speed

rotation, it is widely used in automobile transmission systems, agricultural machinery, construction machinery and other mechanical fields with high requirements on quality and performance.

Great, now you know where to buy NTN 6906 LU bearings. Hope this helps you.
